1 Introduction

Here we will be displaying various data summaries and analyses related to dolphin management in the U.S. South Atlantic.

1.1 Load Libraries

The documentation of this data exploration was developed in R, using R Studio and Quarto. The following R libraries were also used. The `pals` package allows for improved visualization with different color palettes (**pals?**). The `rerddap` package allows for efficient downloads of physical data from the ERDDAP server (**rerddap?**).

2 Chapter 1 - NOAA Fisheries landings data

Here we will explore commercial and recreational landings data accessed through the FOSS (Fisheries One Stop Shop) data portal. The advantage of this portal is that commercial and recreational data are available side-by-side in the same units (pounds landed).

2.1 Data access and upload

Data are downloaded from the NMFS FOSS site: [<https://www.fisheries.noaa.gov/foss/f?p=21>]. For the Data Set, we choose both commercial and recreational. For the Years, we select all years from 1980 to 2021. For NMFS Region, we select the "NMFS Regions" button and then select the Gulf, South Atlantic, Middle Atlantic and New England from the box. For the Species, we select "Dolphinfish" and "Dolphinfish**." For Report Format, we choose TOTALS BY YEAR/REGION. Hitting the "RUN REPORT" button then generates the data needed for the subsequent analysis, which can be downloaded under the "Actions" button.

We then read in the data file and clean it for analysis (removing the commas from the numbers so that R recognizes the values as numbers). We output the file header to make sure it was read in and that the numbers were converted correctly.

	Year	Region.Name	Pounds	Dollars	Collection	Metric.Tons
1	2000	Gulf	582,576	689,637	Commercial	264
2	2000	Gulf	5,641,491		Recreational	2,559
3	2000	New England	6,545	12,414	Commercial	3
4	2000	South Atlantic	537,077	821,743	Commercial	244
5	2000	South Atlantic	16,049,049		Recreational	7,280
6	2000	Middle Atlantic	36,048	65,004	Commercial	16

	Year	Region.Name	Pounds	Dollars	Collection	Metric.Tons
1	2000	Gulf	582576	689637	Commercial	264
2	2000	Gulf	5641491	NA	Recreational	2559

2 Chapter 1 - NOAA Fisheries landings data

3	2000	New England	6545	12414	Commercial	3
4	2000	South Atlantic	537077	821743	Commercial	244
5	2000	South Atlantic	16049049	NA	Recreational	7280
6	2000	Middle Atlantic	36048	65004	Commercial	16

2.2 Summarize the landings

We then summarize the landings (in pounds) by year, sector, and region. The result is a new data frame with each row representing a year and each column representing the total landings for each region and sector.

, , Gulf

2.3 Plot the summary

Now we plot the data, using similar color schemes by region. Because the recreational data have high imprecision prior to the 1990s we plot from 1990 to the last year of data.

3 Updated Gulf/Atlantic parsing of data

There are some issues with the way that the FOSS system splits out Gulf and Atlantic catches by Monroe County, which is on the border between the two jurisdictions. We received data from Mike Larkin of SERO which has the correct split out of data for Monroe County between the Gulf and Atlantic. We compare the total recreational catch for the Gulf and Atlantic between the FOSS data and the updated data. The numbers are very close; the average difference from the FOSS data is 2%.

Mode	TRUE
logical	31

Comparison of FOSS data with corrected split by Monroe
