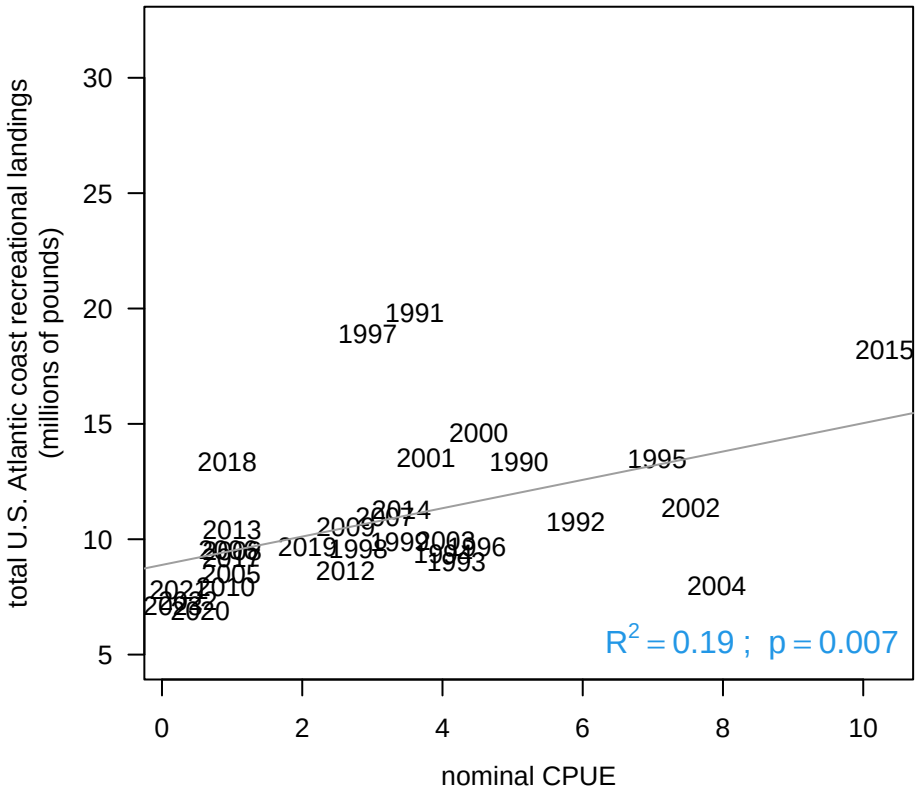
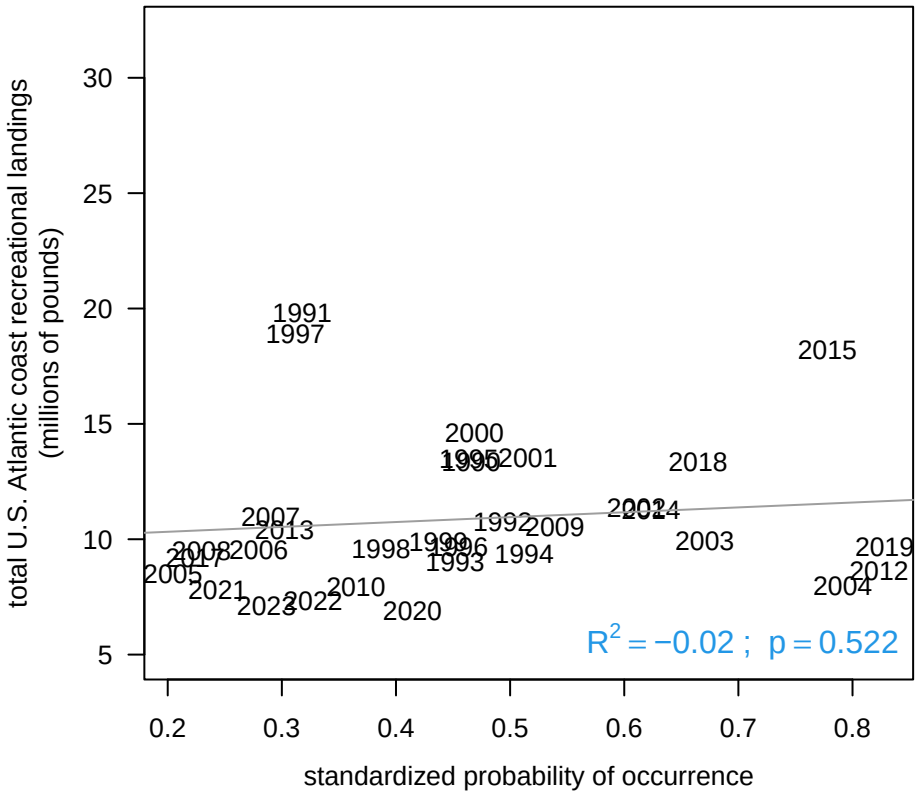
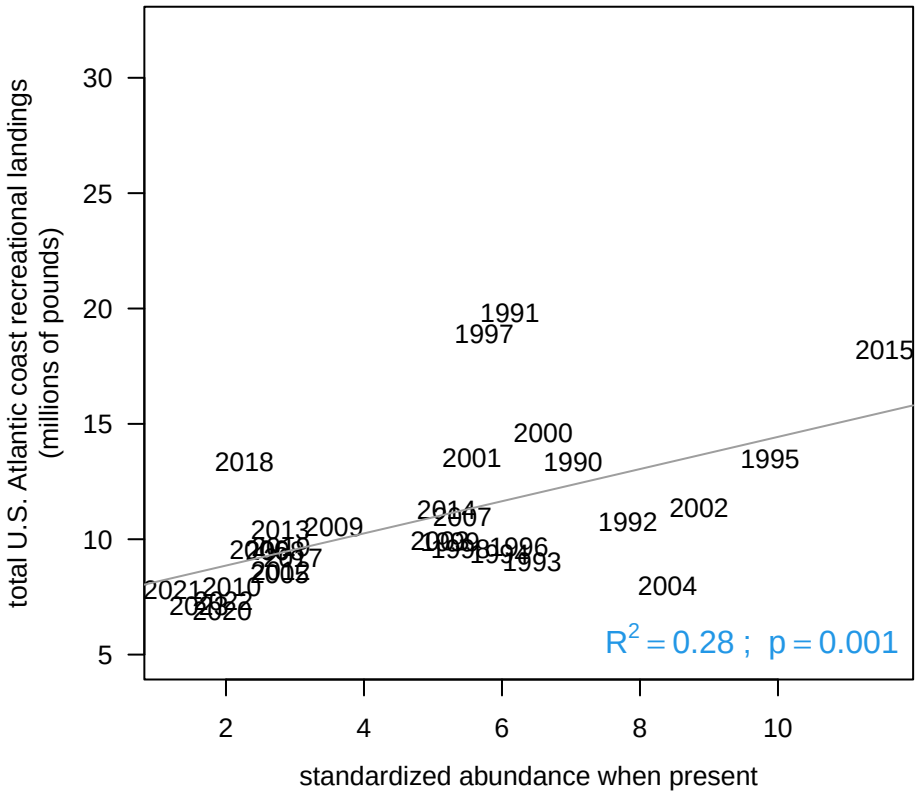
total U.S. Atlantic coast recreational landings
(millions of pounds)
standardized CPUE index
$R^2 = 0.13$; $p = 0.022$



total U.S. Atlantic coast recreational landings
(millions of pounds)
nominal CPUE
$R^2 = 0.19$; $p = 0.007$



total U.S. Atlantic coast recreational landings
(millions of pounds)
standardized probability of occurrence
$R^2 = -0.02$; $p = 0.522$



total U.S. Atlantic coast recreational landings
(millions of pounds)
standardized abundance when present
$R^2 = 0.28$; $p = 0.001$
